

ASSIGNMENT 0

Let's get familiar with Git first. Read about version control and Configure Git on your laptops.

Note : For Windows machines, use Git Bash.

How to submit assignments?

Through Git of course. This video should help you out.

Steps

Fork the repository

<https://github.com/ACM-NITK/Machine-Learning-SMP-2019.git>

Clone the forked repository using:

git clone

[https://github.com/your-github-username/Machine-Learning-SMP-2019.](https://github.com/your-github-username/Machine-Learning-SMP-2019.git)

git

Change directory and create a folder with your name.

Inside the folder create a text file with your details : Your name, your register number, what you have already explored in this field and a song best suited to describe you :P

cd Machine-Learning-SMP-2019/'Assignment 0'

mkdir your-name

cd your-name

gedit prologue.txt

Add and commit changes. Push it to your repository.

git add .

git commit -m "Your message"

git push origin master

Login to github and send a pull request to
ACM-NITK/Machine-Learning-SMP-2019.

To configure upstream:

git remote add upstream

<https://github.com/ACM-NITK/Machine-Learning-SMP-2019.git>

To pull the latest changes:

git fetch upstream

git checkout master

git merge upstream/master

Good Luck
